Accomplished Digital Analytics & Implementation Engineer specializing in Adobe Experience Platform (AEP), Customer Journey Analytics (CJA), and Adobe Tags (Launch). Primary engineer for analytics migrations and automation for three NCLH brands, reducing tag management costs by over \$70K annually. Developed scalable data schemas, automated QA solutions, and custom JavaScript validation, while sharing tools and documentation that accelerated development across engineering and product teams.

Experience

Digital Analytics Engineer | Norwegian Cruise Line Holdings | Remote | 2024 – 2026

- Reduced tag management costs by over \$70K annually by migrating Tealium properties to Adobe Tags across all three NCLH brands.
- Established a consistent, scalable data foundation across all three brands by migrating from Adobe Analytics to AEP and CJA, implementing AEP Web SDK and architecting a reusable schema.
- Improved data quality and prevented batch ingestion errors by developing custom JavaScript in Adobe Tags to validate and normalize telemetry before ingestion into AEP.
- Reduced manual review effort and supported continuous development by establishing the team's GitHub repository and code review process, and then introducing automated GitHub Copilot reviews.
- Accelerated development and improved reliability by building automated test suites that validated hundreds of implementation scenarios; shared the tools across the engineering team via GitHub.
- Improved consistency and accelerated development and testing by creating modular Confluence documentation used across engineering, QA, and product teams.
- Eliminated unnecessary redirects that consumed ObservePoint scan limits by developing JavaScript to standardize HREF formats before scans.

MarTech Frontend Developer | Princess Cruises | Remote | 2019 – 2024

- Modernized scalable data collection by architecting an AEP schema and implementing AEP Web SDK tracking via Adobe Tags.
- Enabled robust data collection by implementing and maintaining Adobe Analytics tracking and third-party marketing pixels via Adobe Tags.
- Ensured data quality and compliance by programming and monitoring ObservePoint audits and journeys.
- Ensured regulatory compliance by implementing OneTrust updates and configuring consent-based conditions within Adobe Tags rules.
- Supported analytics implementation, development workflows, and QA by creating and maintaining modular technical documentation in Confluence.

UI/UX Developer | fusionZONE Automotive, LLC | Pacific Palisades, CA | 2018 – 2019

- Designed and coded mobile-first web pages for automotive dealerships nationwide, including Acura, BMW, Chevrolet, Honda, Hyundai, Jeep, Nissan, Toyota, and other major brands.
- Ensured web page integrity and search visibility by adhering to style guide requirements for all brands, web UX principles, and SEO best practices across client sites.
- Created Adobe XD wireframes, mockups, and prototypes for client websites.
- Delivered quality projects on time by collaborating with implementation managers, client services, backend developers, and graphic design teams.

Education

The Coding Boot Camp at UCLA Extension | Full Stack Web Development Certificate | Los Angeles, CA
Chapman University | BFA, Film Production | Orange, CA

Certifications

ObservePoint Certified Professional

Skills

Adobe Tags (Launch), Adobe Experience Platform (AEP), AEP Web SDK, Customer Journey Analytics (CJA), JavaScript, ObservePoint, Adobe Analytics, Git, GitHub, Bitbucket, HTML, CSS, Confluence, Jira, OneTrust.
